Safe Operation Practices for Pedestrian-Controlled Rotary Lawnmowers

MEETS CPSC SAFETY REQUIREMENTS

Our rotary walk-behind power lawn mowers conform to the safety standards of the American National Standards Institute and the U.S. Consumer Product Safety Commission.

IMPORTANT: This cutting machine is capable of amputating hands and feet and throwing objects. Failure to observe the following safety instructions could result in serious injury or death.

⚠CAUTION: Always disconnect spark plug wire and place wire where it cannot contact spark plug in order to prevent accidental starting when setting up, transporting, adjusting or making repairs.

⚠CAUTION: Muffler and other engine parts become extremely hot during operation and remain hot after engine has stopped. To avoid severe burns on contact, stay away from these areas.

⚠WARNING: This lawn mower is equipped with an internal combustion engine and should not be used on or near any unimproved forest-covered, brush-covered or grass-covered land unless the engine's exhaust system is equipped with a spark arrester meeting applicable local or state laws (if any). If a spark arrester is used, it should be maintained in effective working order by the operator. A spark arrester for the muffler is available through your nearest authorized service center.

⚠WARNING: Engine exhaust, some of its constituents, and certain vehicle components contain or emit chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

⚠WARNING: Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.

⚠WARNING: The blade turns when the engine is running.

I. GENERAL OPERATION

- Read, understand, and follow all instructions on the machine and in the manual(s) before starting. Be thoroughly familiar with the controls and the proper use of the machine before starting.
- Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times.
- Only allow responsible individuals, who are familiar with the instructions, to operate the machine.
- Clear the area of objects such as rocks, toys, wire, bones, sticks, etc., which could be picked up and thrown by the blade.
- Be sure the area is clear of other people before mowing. Stop machine if anyone enters the area.
- Do not operate the mower when barefoot or wearing open sandals. Always wear substantial foot wear.
- Do not pull mower backwards unless absolutely necessary. Always look down and behind before and while moving backwards.
- Never direct discharged material toward anyone. Avoid discharging material against a wall or obstruction. Material may ricochet back toward the operator. Stop the blade when crossing gravel surfaces.

- Do not operate the mower without proper guards, plates, grass catcher or other safety protective devices in place.
- See manufacturer's instructions for proper operation and installation of accessories. Only use accessories approved by the manufacturer.
- Stop the blade(s) when crossing gravel drives, walks, or roads.
- Stop the engine (motor) whenever you leave the equipment, before cleaning the mower or unclogging the chute.
- Shut the engine (motor) off and wait until the blade comes to complete stop before removing grass catcher.
- Mow only in daylight or good artificial light.
- Do not operate the machine while under the influence of alcohol or drugs.
- Never operate machine in wet grass. Always be sure of your footing: keep a firm hold on the handle and walk; never run.
- Disengage the self-propelled mechanism or drive clutch on mowers so equipped before starting the engine (motor).
- If the equipment should start to vibrate abnormally, stop the engine (motor) and check immediately for the cause. Vibration is generally a warning of trouble.
- Always wear safety goggles or safety glasses with side shields when operating mower.
- Never leave a running machine unattended.

II. SLOPE OPERATION

Slopes are a major factor related to slip and fall accidents which can result in severe injury. All slopes require extra caution. If you feel uneasy on a slope, do not mow it.

DO:

- Mow across the face of slopes: never up and down. Exercise extreme caution when changing direction on slopes.
- Remove obstacles such as rocks, tree limbs, etc.
- Watch for holes, ruts, or bumps. Tall grass can hide obstacles.

DO NOT:

- Do not trim near drop-offs, ditches or embankments. The operator could lose footing or balance.
- Do not trim excessively steep slopes.
- Do not mow on wet grass. Reduced footing could cause slipping.

III. CHILDREN

Tragic accidents can occur if the operator is not alert to the presence of children. Children are often attracted to the machine and the mowing activity. *Never* assume that children will remain where you last saw them.

- Keep children out of the trimming area and under the watchful care of another responsible adult.
- Be alert and turn machine off if children enter the area.
- Before and while walking backwards, look behind and *down* for small children.
- Never allow children to operate the machine.
- Use extra care when approaching blind corners, shrubs, trees, or other objects that may obscure vision.

⚠WARNING: CHILDREN CAN BE INJURED BY THIS EQUIPMENT. The American Academy of Pediatrics recommends that children be a minimum of 12 year of age before operating a pedestrian controlled lawn mower and a minimum of 16 years of age before operating a riding lawn mower.

- When loading or unloading this machine, do not exceed the maximum recommended operation angle of 15°.
- Wear proper Personal Protective Equipment (PPE) while operating this machine, including (at a minimum) sturdy footwear, eye protection, and hearing protection. Do not mow in short and/or, open toed footwear.

Always let someone know you are outside mowing.

IV. SAFE HANDLING OF GASOLINE

Use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive. **IMPORTANT:** This lawn mower is shipped WITHOUT OIL OR GASOLINE in the engine.

NOTE: Gasoline containing up to 10% ethanol (E10) is acceptable for use in this machine. The use of any gasoline exceeding 10% ethanol (E10) will void the product warranty.

- Extinguish all cigarettes, cigars, pipes and other sources of ignition.
- Use only an approved container.
- Never remove gas cap or add fuel with the engine running. Allow engine to cool before refueling.
- Never refuel the machine indoors.
- Never store the machine or fuel container where there is an open flame, spark or pilot light such as a water heater or on other appliances.
- Never fill containers inside a vehicle, on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
- Remove gas-powered equipment from the truck or trailer and refuel it on the ground. If this is not possible, then refuel such equipment with a portable container, rather than from a gasoline dispenser nozzle.
- Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.
- If fuel is spilled on clothing, change clothing immediately.
- Never overfill fuel tank. Replace gas cap; tighten securely.

V. GENERAL SERVICE

- Never run a machine inside a closed area.
- Never make adjustments or repairs with the engine (motor) running. Disconnect spark plug wire, and keep wire away from plug to prevent accidental starting.
- Keep nuts and bolts, especially blade attachment bolts, tight and keep equipment in good condition.
- Never tamper with safety devices. Check their proper operation regularly.
- Keep machine free of grass, leaves, or other debris build-up. Clean oil or fuel spillage. Allow machine to cool before storing.
- Stop and inspect the equipment if you strike an object. Repair, if necessary, before restarting.
- Never attempt to make wheel height adjustments while the engine (motor) is running.
- Grass catcher components are subject to wear, damage, and deterioration, which could expose moving parts or allow objects to be thrown. Frequently check components and replace with manufacturer's recommended parts, when necessary.
- Mower blade is sharp and can cut. Wrap the blade or wear gloves, and use extra caution when servicing it.

- Do not change the engine governor setting or overspeed the engine.
- Maintain or replace safety and instruction labels, as necessary.
- Never do anything to interfere with the intended function of a safety device or to reduce the protection provided by a safety device.

IMPORTANT : La lame de cette tondeuse autoportée peut trancher les mains et les pieds et projeter des objets.

Le non-respect de ces consignes de sécurité peut entraîner des accidents graves, voire mortels.

⚠ATTENTION : Débranchez toujours le fil de la bougie d'allumage et éloignez-le pour éviter les risques de démarrage accidentel pendant la préparation, le transport, le réglage ou les réparations.

⚠ATTENTION : Le silencieux, ainsi que d'autres composants du moteur peuvent devenir très chauds pendant le fonctionnement de la machine et rester chauds encore un moment après l'arrêt du moteur. Pour éviter toute brûlure, ne pas s'approcher de ces zones.

⚠AVERTISSEMENT : Cette tondeuse est équipée d'un moteur à combustion interne et ne doit pas être utilisée sur ou à proximité de terrains boisés non entretenus, recouverts de buissons ou d'herbe, sauf si le système d'échappement est équipé d'un pare-étincelles conforme à la législation locale ou nationale (le cas échéant). En cas d'utilisation d'un pare-étincelles, l'opérateur doit veiller à le maintenir en bon état de fonctionnement. Un pare-étincelles est disponible pour le pot d'échappement auprès du centre d'assistance agréé le plus proche.

⚠AVERTISSEMENT : L'échappement ainsi que certains composants de l'échappement et de l'engin contiennent ou émettent des produits chimiques reconnus par l'État de Californie comme pouvant provoquer des cancers et des malformations congénitales ou d'autres troubles de la reproduction.

⚠AVERTISSEMENT : Les bornes de la batterie, les terminaisons et les accessoires correspondants contiennent du plomb et des composés de plomb. Ces produits chimiques sont reconnus par l'État de Californie comme pouvant provoquer des cancers et des malformations congénitales ou d'autres troubles de la reproduction. Lavez-vous les mains après avoir manipulé ces composants.

⚠AVERTISSEMENT : La lame tourne lorsque le moteur est en marche.

I. CONSIGNES GÉNÉRALES

- Avant utilisation, lisez, familiarisez-vous et suivez toutes les consignes contenues dans ce(s) manuel(s) et apposées sur la machine. Il est indispensable de bien se familiariser avec l'équipement et ses commandes avant de l'utiliser.
- Ne placez pas vos mains ou vos pieds à proximité ou sous les organes mobiles. Restez toujours éloigné de la goulotte d'éjection.
- N'autorisez que des personnes responsables ayant pris connaissance des consignes à utiliser la machine.
- Avant de procéder à la tonte, éliminez tout objet qui pourrait être projeté par la lame (ex : pierres, jouets, fil de fer, os, bâtons, etc.).
- Avant de commencer, vérifiez que personne ne se trouve dans la zone de travail. Arrêtez la machine dès que quelqu'un entre dans la zone de travail.
- N'utilisez pas cette tondeuse si vous êtes pieds nus ou si vous portez des sandales ouvertes. Portez toujours des chaussures adaptées.
- Ne faites pas marche arrière avec la tondeuse, sauf en cas de nécessité absolue. Regardez toujours vers le bas et en arrière avant et pendant un déplacement en marche arrière.

- N'orientez jamais les matériaux éjectés en direction d'autres personnes. Évitez d'éjecter les matériaux contre un mur ou tout autre obstacle. Ils pourraient ricocher et être projetés vers l'utilisateur. Arrêtez la lame avant de passer sur du gravier.
- N'utilisez pas la tondeuse si les protections, les plaques, le bac de ramassage et les autres dispositifs de protection appropriés ne sont pas en place.
- Consultez les consignes du fabricant pour l'utilisation et le montage correct des accessoires. Utilisez exclusivement des accessoires agréés par le fabricant.
- Arrêtez la ou les lame(s) pour traverser les allées, les chemins ou les routes.
- Coupez le moteur si vous vous éloignez de la tondeuse, avant de la nettoyer ou d'éliminer un bouchage.
- Coupez le moteur et attendez que la lame se soit complètement immobilisée avant d'enlever le bac de ramassage.
- Tondez uniquement à la lumière du jour ou sous un bon éclairage artificiel.
- N'utilisez pas la machine si vous êtes sous l'influence d'alcool ou de médicaments.
- N'utilisez jamais la machine sur de l'herbe mouillée. Gardez les pieds toujours bien daplomb sur le sol, maintenez la poignée avec fermeté et marchez ; ne courez jamais.
- Avant de mettre le moteur en marche, désengagez le mécanisme d'autopropulsion ou l'embrayage sur les tondeuses qui en sont équipées.
- Si l'équipement émet des vibrations anormales, arrêtez le moteur et recherchez immédiatement la cause. Les vibrations sont généralement le signe d'une anomalie.
- Portez toujours des lunettes de sécurité munies de protections latérales lorsque vous utilisez la tondeuse.
- Ne laissez jamais la machine en marche sans surveillance.

II. TERRAINS EN FORTE DÉCLIVITÉ

La conduite en pente est l'une des opérations présentant le plus grand risque de glissement ou de chute susceptibles de provoquer des blessures graves. Redoublez de vigilance sur les terrains en pente. Si vous ne vous sentez pas à l'aise sur une zone en pente, ne la tondez pas.

OPÉRATIONS AUTORISÉES :

- Tondez dans le sens transversal de la pente, jamais de haut en bas. Faites très attention lorsque vous changez de direction sur des surfaces en pente.
- Éliminez les obstacles (pierres, branches d'arbre, etc.).
- Faites attention aux trous, aux ornières ou aux bosses. Les herbes hautes peuvent dissimuler des obstacles.

OPÉRATIONS INTERDITES :

- Ne tondez pas à proximité de bas-côtés, de fossés ou de talus. Vous risquez de perdre appui/l'équilibre.
- N'utilisez pas la machine sur des pentes raides.
- Ne tondez pas l'herbe lorsqu'elle est mouillée. Vous risquez de glisser si vous perdez appui.

III. ENFANTS

Des accidents tragiques peuvent se produire si l'opérateur ne prend pas garde à la présence d'enfants. Les enfants sont souvent attirés par la

machine et par son usage. Ne supposez jamais que les enfants restent en place et qu'ils se trouvent encore à l'endroit où vous les avez vus pour la dernière fois.

- Éloignez les enfants de la zone que vous souhaitez tondre et laissez-les sous la surveillance d'un autre adulte.
- Soyez attentif et arrêtez la machine si un enfant entre dans votre zone de travail.
- Avant et pendant une marche arrière, regardez vers l'arrière et le bas pour vous assurer qu'il n'y a pas d'enfant derrière vous.
- Ne laissez jamais un enfant manipuler cette machine.
- Observez la plus grande prudence à proximité des angles, des buissons, des arbres et de tout autre obstacle susceptible d'entraver la visibilité.

AVERTISSEMENT : CETTE MACHINE PEUT ÊTRE DANGEREUSE POUR LES ENFANTS. Selon l'Académie américaine de pédiatrie, il faut que les enfants aient au minimum 12 ans avant d'utiliser une tondeuse à pousser et au minimum 16 ans avant d'utiliser une tondeuse autoportée.

- Il ne faut pas dépasser un angle maximum de 15° pour charger et décharger cette machine.
- Portez l'équipement de protection individuelle (EPI) approprié pendant l'utilisation de la machine, y compris (au minimum) des chaussures de protection, des lunettes de protection et une protection auditive. Ne tondez pas en chaussures découvertes et/ou à bout ouvert.

Veillez à informer une tierce personne que vous êtes en train de tondre à l'extérieur.

IV. MANIPULATION DE L'ESSENCE EN TOUTE SECURITE

Faites très attention lors de la manipulation de l'essence. L'essence est extrêmement inflammable et ses vapeurs sont explosives.

IMPORTANT : Cette tondeuse est livrée SANS HUILE NI ESSENCE dans le moteur.

REMARQUE : De l'essence contenant jusqu'à 10 % d'éthanol (E10) peut être utilisée dans cet équipement. L'utilisation d'essence contenant plus de 10 % d'éthanol (E10) annulera la garantie du produit.

- Éteignez cigarette, cigare, pipe ou toute autre source d'inflammation.
- N'utilisez que des bidons d'essence homologués.
- Ne retirez jamais le bouchon du réservoir et ne faites jamais l'appoint de carburant lorsque le moteur est allumé. Laissez refroidir le moteur avant de faire l'appoint de carburant.
- Ne faites jamais l'appoint en carburant à l'intérieur d'un bâtiment.
- Ne rangez jamais l'équipement ou le récipient d'essence à proximité d'une flamme nue, d'une source d'étincelles ou d'une veilleuse, comme celle d'un chauffe-eau ou d'un autre appareil.
- Ne remplissez jamais le récipient à l'intérieur d'un véhicule, sur un camion ou sur une remorque avec une bâche en plastique. Avant de le remplir, placez toujours le récipient sur le sol, à l'écart du véhicule.
- Descendez l'équipement du camion ou de la remorque et faites l'appoint en carburant à même le sol. Si ce n'est pas possible, faites le plein sur la remorque à l'aide d'un bidon ou d'un autre récipient ; n'utilisez pas le pistolet de la pompe à essence.

- Laissez le pistolet en permanence en contact avec le rebord de l'ouverture du réservoir de carburant ou du bidon, jusqu'à ce que le plein de carburant soit terminé. N'utilisez pas un pistolet doté d'un dispositif de verrouillage en position ouverte.
- Si vos vêtements ont été aspergés de carburant, changez-les immédiatement.
- Ne remplissez pas excessivement le réservoir de carburant. Remettez le bouchon en place et vissez-le fermement.

V. ENTRETIEN GENERAL

- N'utilisez jamais la machine dans un espace clos.
- N'effectuez jamais de réglages ou de réparations avec le moteur allumé. Débranchez le fil de la bougie et éloignez-le de la bougie pour éviter les démarrages accidentels.
- Veillez à ce que les écrous et les boulons, notamment les boulons de fixation de la lame, restent bien serrés et que l'équipement soit toujours en bon état.
- Ne modifiez jamais les équipements de sécurité. Contrôlez-les régulièrement pour vérifier leur bon fonctionnement.
- Veillez à ce que la tondeuse reste propre en éliminant l'herbe, les feuilles ou autres débris accumulés. Nettoyez l'huile ou l'essence renversée. Laissez la machine refroidir avant de la remiser.
- Arrêtez et inspectez l'équipement si vous entrez en contact avec un objet. Si une réparation est nécessaire, effectuez-la avant de reprendre le travail.
- N'essayez jamais de régler la hauteur des roues lorsque le moteur est en marche.
- Certains composants du bac de ramassage peuvent s'user, être endommagés et se détériorer, ce qui risque d'exposer les organes mobiles ou de permettre la projection d'objets. Contrôlez fréquemment les composants et remplacez-les par des pièces agréées par le fabricant, si nécessaire.
- La lame de la tondeuse est acérée et peut provoquer des coupures. Enveloppez la lame ou portez des gants et soyez extrêmement prudent lorsque vous procédez à son entretien.
- Ne modifiez pas le réglage du limiteur de régime et ne faites pas tourner le moteur en sursrégime.
- Conservez en bon état les étiquettes d'instructions et de sécurité ; remplacez-les si nécessaire.
- N'entreprenez jamais d'opération susceptible d'interférer avec la fonction première d'un dispositif de sécurité ou d'atténuer la protection offerte par celui-ci.

 **Práticas de funcionamento seguro para corta-relvas rotativos com operador apeado**

CUMPRE OS REQUISITOS DE SEGURANÇA DA CPSC

Os nossos corta-relvas elétricos com operador apeado estão em conformidade com as normas de segurança do American National Standards Institute (instituto norte-americano de normalização) e a Consumer Product Safety Commission (comissão norte-americana responsável pela segurança dos produtos de consumo).

IMPORTANTE: Esta máquina de corte é capaz de amputar mãos e pés e de arremessar objetos. O não cumprimento das seguintes instruções de segurança pode causar ferimentos graves ou fatais.

⚠️ CUIDADO: Desligue sempre o cabo da vela de ignição e coloque-o de modo a que não possa entrar em contacto com a vela, a fim de evitar o arranque acidental quando estiver a realizar operações de preparação, transporte, regulação ou reparação.

⚠️ CUIDADO: O silenciador e outras partes do motor ficam extremamente quentes durante o funcionamento e permanecem quentes depois de o motor ser desligado. Para evitar queimaduras graves, mantenha-se afastado destas áreas.

⚠️ AVISO: Este corta-relvas está equipado com um motor de combustão interna e não deve ser utilizado em ou perto de um terreno coberto de floresta, vegetação ou relva não melhorado, exceto se o sistema de escape do motor estiver equipado com um supressor de faísca que cumpra as leis locais ou nacionais aplicáveis (se existentes). Se for utilizado um supressor de faísca, deverá ser mantido em boas condições de funcionamento pelo operador. Um supressor de faísca para o silenciador pode ser adquirido no centro de assistência autorizado mais perto de si.

⚠️ AVISO: O escape do motor, alguns constituintes e determinados componentes do veículo contêm ou emitem químicos, conhecidos no Estado da Califórnia por causarem cancro e malformações congénitas ou outros danos no aparelho reprodutivo.

⚠️ AVISO: terminais e conectores de bateria e acessórios relacionados contêm chumbo e compostos de chumbo, químicos conhecidos no Estado da Califórnia podem causar cancro e malformações congénitas ou outros danos no sistema reprodutivo. Lave as mãos depois de manusear estes componentes.

⚠️ AVISO: a lâmina roda com o motor em funcionamento.

I. FUNCIONAMENTO GERAL

- Leia, compreenda e siga todas as instruções que se encontram na máquina e no(s) manual(-ais) antes da respetiva colocação em funcionamento. Familiarize-se bem com os comandos e a utilização correta da máquina antes de a colocar em funcionamento.
- Não coloque as mãos ou os pés perto ou por baixo de peças em rotação. Mantenha-se sempre afastado da abertura de descarga.
- A máquina deve ser operada apenas por pessoas responsáveis e familiarizadas com as respetivas instruções.
- Limpe a área de objetos, como pedras, brinquedos, arames, ossos, paus, etc., que possam ser apanhados e projetados pela lâmina.
- Certifique-se de que não se encontram outras pessoas na área antes de cortar a relva. Pare a máquina se alguém entrar na área de trabalho.
- Não opere o corta-relvas sem sapatos ou com sandálias abertas. Use sempre calçado adequado.
- Não puxe o corta-relvas para trás, exceto quando estritamente necessário. Olhe sempre para baixo e para trás antes e enquanto se desloca para trás.
- Nunca direcione o material descarregado para pessoas. Evite descarregar material contra

uma parede ou um obstáculo. O material pode fazer ricochete para o operador. Pare a lâmina quando atravessar superfícies com cascalho.

- Não opere o corta-relvas sem proteções, placas ou outros dispositivos de segurança adequados devidamente montados.
- Consulte as instruções do fabricante sobre o funcionamento e a instalação corretos de acessórios. Utilize apenas acessórios aprovados pelo fabricante.
- Pare a(s) lâmina(s) ao passar por caminhos de cascalho, passeios ou estradas.
- Pare o motor sempre que não estiver a utilizar o equipamento, antes de limpar o corta-relvas ou desobstruir o tubo de descarga.
- Desligue o motor e aguarde até que a lâmina pare completamente antes de remover o coletor.
- Corte a relva sempre à luz do dia ou com uma boa luz artificial.
- Não opere a máquina sob a influência de álcool ou drogas.
- Nunca utilize a máquina em relva molhada. Certifique-se sempre que se encontra sobre uma superfície estável e segure na pega com firmeza; nunca corra.
- Desengate o mecanismo automotor ou a embraiagem nos corta-relvas equipados com o(a) mesmo(a) antes de ligar o motor.
- Se o equipamento começar a vibrar de forma estranha, pare o motor e verifique imediatamente a causa. Geralmente, a vibração indica uma anomalia.
- Use sempre óculos e viseiras de segurança com palas laterais durante a operação do corta-relvas.
- Nunca deixe a máquina a funcionar sem vigilância.

II. FUNCIONAMENTO EM DECLIVES

Os declives são um dos principais fatores relacionados com derrapagens e quedas, podendo resultar em lesões graves. É necessário cuidado extra em declives. Caso se sinta desconfortável num declive, não corte a relva.

PROCEDA DA SEGUINTE FORMA:

- Corte a relva ao longo dos declives (na horizontal), nunca para cima e para baixo. Tenha extremo cuidado ao mudar de direção em declives.
- Remova obstáculos, como rochas, ramos de árvores, etc.
- Tenha em atenção buracos, sulcos ou elevações. A relva alta pode ocultar obstáculos.

NÃO PROCEDA DA SEGUINTE FORMA:

- Não corte a relva junto a descidas, valas ou aterros. O operador pode tropeçar ou perder o equilíbrio.
- Não corte a relva em encostas excessivamente íngremes.
- Não corte relva molhada. O apoio reduzido dos pés pode causar derrapagem.

III. CRIANÇAS

Podem ocorrer acidentes trágicos se o operador não for alertado para a presença de crianças. As crianças são frequentemente atraídas pela máquina e pela atividade de cortar a relva. Nunca assuma que as crianças irão permanecer no local onde as viu da última vez.

- Mantenha as crianças afastadas da área de trabalho e sob a vigilância de um adulto responsável.
- Esteja alerta e desligue a máquina se uma criança entrar na área de trabalho.

- Antes e ao se deslocar para trás, olhe sempre para trás e para baixo, para verificar se não existem crianças pequenas na área.
- Nunca permita que crianças operem a máquina.
- Tenha cuidado extra ao aproximar-se de curvas sem visibilidade, arbustos, árvores ou outros objetos que possam obscurecer a visão.

⚠️ AVISO: ESTE EQUIPAMENTO PODE FERIR AS CRIANÇAS. A Academia Americana de Pediatria recomenda que as crianças tenham um mínimo de 12 anos de idade para operar um corta-relvas com operador apeado e um mínimo de 16 anos de idade para operar um corta-relvas com operador sentado.

- Quando carregar ou descarregar esta máquina, não exceda o ângulo de operação máximo recomendado de 15°.
- Utilize equipamento de proteção pessoal (EPP) adequado durante a operação da máquina, incluindo (no mínimo) calçado resistente, óculos de proteção e proteção auditiva. Não corte a relva com calçado curto e/ou aberto.

Informe sempre alguém de que está no exterior a cortar a relva.

IV. MANUSEAMENTO SEGURO DA GASOLINA

Tenha cuidado extremo ao manusear gasolina. A gasolina é extremamente inflamável e os seus vapores são explosivos.

IMPORTANTE: Este corte-relvas é fornecido SEM ÓLEO OU GASOLINA no motor.

NOTA: Gasolina que contenha até 10% de etanol (E10) é aceitável para utilização na máquina. A utilização de gasolina com mais de 10% de etanol (E10) anulará a garantia do produto.

- Apague todos os cigarros, charutos, cachimbos e outras fontes de ignição.
- Utilize um contentor aprovado.
- Nunca remova o tampão da gasolina ou adicione combustível com o motor em funcionamento. Deixe o motor arrefecer antes de reabastecer.
- Nunca reabasteça a máquina em locais fechados.
- Nunca guarde a máquina ou o depósito de combustível em locais com chamas abertas, faíscas ou luz piloto, como um aquecedor de água ou outros aparelhos.
- Nunca encha os depósitos no interior de um veículo, na plataforma de camião ou atrelado com cobertura de plástico. Coloque sempre os depósitos no chão, afastados do veículo, antes de encher.
- Retire o equipamento a gasolina do camião ou atrelado e reabasteça-o no chão. Se tal não for possível, reabasteça o equipamento com um depósito portátil, em vez de uma pistola de gasolina.
- Mantenha sempre a pistola em contacto com o rebordo da abertura do depósito de combustível até acabar de abastecer. Não utilize um dispositivo de bloqueio/abertura da pistola.
- Se derramar combustível na roupa, mude imediatamente de roupa.
- Nunca ateste demasiado o depósito de combustível. Volte a colocar o tampão de gasolina e aperte bem.

V. MANUTENÇÃO GERAL

- Nunca opere uma máquina numa área fechada.
- Nunca efetue ajustes ou reparações com o motor em funcionamento. Desligue o cabo de ignição e mantenha-o afastado da vela de ignição, para evitar um arranque acidental.

- Mantenha as porcas e os parafusos, especialmente os parafusos de fixação da lâmina, bem apertados e o equipamento em boas condições de funcionamento.
- Nunca faça alterações nos dispositivos de segurança. Verifique regularmente se estes estão a funcionar corretamente.
- Mantenha a máquina livre de acumulações de relva, folhas ou outros resíduos. Limpe o óleo ou o combustível derramado. Deixe a máquina arrefecer antes de a guardar.
- Pare ou inspecione o equipamento, caso embata num objeto. Se necessário, repare antes de reiniciar o trabalho.
- Nunca tente ajustar o peso das rodas com o motor em funcionamento.
- Os componentes de recolha de relva estão sujeitos a desgaste, danos e deterioração, podendo levar à exposição de peças ou à projeção de objetos. Verifique frequentemente os componentes e, se necessário, substitua por peças recomendadas pelo fabricante.
- A lâmina do corta-relvas é afiada e pode cortar. Envolver a lâmina ou use luvas e tenha um cuidado extra quando efetuar a respetiva manutenção.
- Não altere a configuração do regulador do motor nem exceda a velocidade do motor.
- Mantenha ou substitua os autocolantes de segurança e instruções, conforme necessário.
- Nunca faça nada que interfira com a função prevista de um dispositivo de segurança ou que reduza a proteção proporcionada por um dispositivo de segurança.

Malangizo a kagwiritsidwe ntchito ka makina otchetchera ochita kukankha AKUKWANITSA MFUNDO ZOTETEZA

NGOZI ZA BUNGWE LA CPSC

Starting and Stopping

Place the mower on a flat surface. Note: not on gravel or similar. Fill the tank with petrol, **not oil-blended**. **Do not fill with petrol while the engine is running.**

- To start a cold engine, push primer (3) times before trying to start. Use a firm push. This step is not usually necessary when starting an engine which has already run for a few minutes.
- Hold engine brake yoke to the handle and pull on starter handle quickly. Do not allow starter rope to snap back.
- To "STOP" engine, release engine brake yoke.

NOTE: In cooler weather it may be necessary to repeat priming steps. In warmer weather over priming may cause flooding and engine will not start. If you do flood the engine wait a few minutes before attempting to start and **DO NOT** repeat priming steps.

Marche et Arrêt

Placez la tondeuse sur une surface bien plane. Attention, ni gravier ni gravillons. Remplissez le réservoir d'essence pure **pas de mélange 2 temps**. **Ne pas faire le plein quand le moteur est en marche.**

- Pour mettre un moteur froid en marche, poussez le disp. d'amorçage (3) fois avant d'essayer de le faire démarrer puis poussez fermement. Cette étape n'est pas habituellement nécessaire pour faire démarrer un moteur qui a déjà fonctionné pendant quelques minutes.
- Maintenez la commande contre le guidon et tirez vivement sur le starter. Puis lâchez doucement la ficelle.
- Coupez le moteur en lâchant la commande.

REMARQUE: Sous des températures plus froides il peut être nécessaire de répéter les étapes d'amorçage. Sous des températures plus chaudes trop amorcer peut étouffer le moteur et il refusera de démarrer. Si vous étouffez le moteur, attendez quelques minutes avant d'essayer de le remettre en marche et **NE** répétez PAS les étapes d'amorçage.

pt

Arranque e Parada

Coloque a cortadora numa superfície plana. Obs.: evite cascalho ou similar. Encha o tanque com gasolina, **sem mistura com óleo**. **Não abasteça gasolina com o motor ligado.**

- Para ligar o motor frio, aperte o botão de injeção tres (3) vezes antes de tentar dar partida. Aperte com firmeza.
- Mantenha o braço de freio do motor na posição IN. Vire a chave de ignição para a posição "ligar".
- Para "DESLIGAR" o motor, solte o braço de freio do motor.

OBS: Em locais com baixas temperaturas, pode ser necessário repetir os passos do botão de injeção. Em locais quentes, o excesso de injeção pode causar afogamento e impedir a partida do motor. Se você afogar o motor, espere alguns minutos antes de tentar dar partida e **NÃO** repita os passos da injeção.

የአየር ማጣሪያውን ማፅዳት

ቡላትን ያላለት (ይፍቱት)፣ ከዳትን (ሊዱን) ይፍቱ፣ እና የማጣሪያ ካርትሪጅን ይፍቱ (1)። የማጣሪያ ካርትሪጅ በጣም ከተበላሸ/ከቆሸሸ በሌላ አዲስ የማጣሪያ ካርትሪጅ ይተኩት።

- -የቅድመ-ማጽጃው (2) በበረኪና እና ውሃ መታጠብ ይቻላል። ካጠቡ በኋላ በነፋስ በደንብ እንዲደርቅ ያድርጉ። ሳይደርቅ ዘይት አይጨምሩበት። ቅድመ-ማጽጃውን ከማጣሪያ ካርትሪጅ ጋር በተመለከተው መሠረት ይግጠሙ።

ቆሻሻ የሆነ የአየር ማጣሪያ በሚጠቀሙበት ጊዜ ሞተር በትኩረት ሳይሰራ ይቻላል እንዲሁም ጭራሽ ሊበላሽ ይችላል። የማሽኑን አየር ማጣሪያ በየአመቱ መቀየር አለበት። በተጨማሪም አባራ በሚበዛበት አካባቢ ቆሻሻ ባለበት ቦታ ሲያጭዱ የማሽኑ አየር ማጣሪያም ሆነ ሌሎች የማሽኑ መሳሪያዎች ከአመት በፊት ቶሎ ቶሎ መጸዳት ይኖርበታል። (በተጨማሪም ስለ ሞተር አጠቃቀም የተጻፈውን መመሪያ ያንብቡ)
