

**INTERACTIVE SERVICE SYSTEM**

Husqvarna P 520D is due for service in two weeks. Book a service at your dealer or order the parts you need.

**Get the full picture today.  
It will pay off tomorrow.**

Husqvarna Fleet Services™ is a management website that gives you an updated, superb overview of your fleet and staff. Many of our handheld and wheeled machines can be fitted with new, smart technology that records a variety of work tasks. These facts are transferred automatically and wirelessly to your Husqvarna Fleet Services™ pages. All this gives you the best possible basis for decision making for planning the business ahead, to ensure high uptime, productivity and – not least – good profitability.

# Go from qualified estimates to indisputable facts.

Sometimes it can be difficult to have complete control over your business. Especially if the business is growing. That's why we've developed Husqvarna Fleet Services™. So that you always have all the information you need to make the right decisions for the smartest, most profitable commercial lawn and garden business. Here are the main features and benefits of the management website.

## MACHINE STATISTICS

### **Contributes to a high utilisation rate.**

Even if all your machines and operators are running at full speed, this does not necessarily equate to good profitability. Husqvarna Fleet Services™ provides quick answers on how productive you really are. You can see how much the whole fleet or a single machine is being used. Day by day, week by week, month by month. For many machines, a comparison between engine time and cutting time is made which shows how efficiently the machines are being used. All this information will guide you into taking the right actions, so as to reduce or expand your fleet, possibly minimising unnecessary transport distances – to create the conditions for a high utilisation rate and good business.

## INTERACTIVE SERVICE SYSTEM

### **Planned stops maximise uptime.**

Machines used intermittently and perhaps by different work teams make it difficult to plan machinery servicing optimally. Our interactive service system helps you take a strategic approach. The system includes a detailed service plan for each of your machines. You will receive an automatic notification 25 hours before the next service interval. Your servicing dealer gets the same message and is ready to help you. You can then order the spare parts and do the service yourself, or book an appointment with your dealer. This maximises the uptime of your machines and minimises sudden, costly stoppages.

## OPERATOR STATISTICS

### **Guides to more efficient work.**

Even very experienced operators can improve the way in which they work by both reducing strenuous tasks and working more efficiently. Husqvarna Fleet Services™ provides active coaching for improved work techniques. A series of operations is recorded and converted to statistics that will serve as a sound basis for evaluating your operators' work. You may need to review certain work tasks. And some operators may be in need of further training. In addition to the work being more comfortable and efficient, a modified working technique can also provide financial benefits in terms of reduced fuel consumption and a longer service life for your machines.

## VIBRATION REPORTS

### **Reduces injury risk, increases productivity.**

Vibrations are both tedious and disastrous for productivity. And operators exposed to vibrations for a period longer than is deemed acceptable are faced with a risk of injury and being absent from work. Even though we constantly strive to reduce vibration levels on our machines, it's still important to keep track of vibration exposure. Using our smart technology, working hours are recorded in conjunction with recommended time for use of each machine. If an operator tends to work for too long with a machine, you will automatically receive a notice to this effect. You can then plan staffing optimally for your daily operations.

# What you see is far from everything you get.

Your start page on Husqvarna Fleet Services™ is like a dashboard of your business. It gives you an overview in an instant of what is working well and what isn't. You clearly see what to do in order to maximise uptime and profitability. But that's far from everything you'll find online. Check out the functions below and you'll soon understand that this is far from an ordinary management website.

## WEBSITE CONTENT:

### FLEET PRODUCTIVITY

- ✓ **MACHINE WORKDAY LOG**  
Compares engine time with working time, showing the utilisation rate for a machine, or the entire fleet.
- ✓ **MACHINE STATISTICS**  
Show how each machine is handled, via percentage of idling, clutching, racing and working time.
- ✓ **SERVICE BOOKS**  
Consist of detailed service plans. Enables you to keep track of previous repairs and services – as well as to plan coming services.

### TEAM PRODUCTIVITY

- ✓ **OPERATOR WORKDAY LOG**  
Compares real activity time with working time, showing the productivity level for an operator, a team or the entire staff.
- ✓ **OPERATOR STATISTICS**  
Show the operator's handling of a machine, via percentage of idling, clutching, racing and working time.
- ✓ **PRODUCTIVITY FOLLOW-UP**  
Enables you to continuously see the productivity trend for your teams.
- ✓ **VIBRATION REPORTS**  
Measure the operator's working time and compares it with recommended working time for the particular machine that's being used.

## WARNINGS AND MESSAGES

- ✓ **MACHINE MESSAGES**  
You'll be notified if a machine isn't handled properly.
- ✓ **SERVICE MESSAGES**  
Tell you, and your authorised dealer, approximately 25 hours before a machine needs service.
- ✓ **OPERATOR MESSAGES**  
Let you know if an operator is not working optimally with a machine.
- ✓ **VIBRATION MESSAGES**  
You'll be notified if an operator tends to work too long with a machine, in terms of vibration exposure.

## MORE SUPPORT

- ✓ **LIBRARY**  
Consists of many valuable documents, such as easy accessible, printable pdf manuals for all your machines.
- ✓ **SPARE PARTS**  
Access to lists of Husqvarna original spare parts for your machines.

## THERE'S EVEN MORE

Explore the management website and you'll find a lot more useful information that allows you to boost business.

## THIS IS HOW IT WORKS

It's easy to get started with Husqvarna Fleet Services™. The dealer equips your machines with sensors, which records the machines' usage parameters. You also have an option to purchase so-called operator electronic id cards, which automatically and wirelessly will be paired with the machine sensors. The dealer registers your machines to your management website and provides you with a login. You connect the supplied base station to the Internet. When within a range of up to 20 metres from the base station, the sensors upload the usage data wirelessly via the base station to your pages, where it's transformed into easily accessible information that tells you the exact uptime and productivity for your machines and operators.

## A FLEXIBLE SUBSCRIPTION

Husqvarna Fleet Services™ is available by subscription. When you equip a machine with a sensor, you'll get a digital service book. You can then subscribe to Machine Workday Log and Machine Statistics. If you equip your operators with id cards, you're able to subscribe to Operator Workday Log, Operator Statistics and Vibration Reports. You can add or remove services at any time via your Husqvarna dealer.
